

## ABSTRACT

A guide member for a curtain airbag that a pipe or rod shaped guide extending vertically relative to the vehicle body along a C pillar. The guide member includes , upper and lower fixing sections for fixing the upper and lower ends of the guide to the C pillar. The guide member also includes temporarily tacking sections for tacking the upper and lower fixing sections to the C pillar, when the guide member is mounted to the C pillar. The C pillar has temporarily-tacking-section insertion openings corresponding to the temporarily tacking sections. When the guide member is mounted to the C pillar, the temporarily tacking sections are inserted into the corresponding temporarily-tacking-section insertion openings for engagement, so that the guide member can be temporarily tacked to the C pillar.
